

LING 520: Computational Analysis of English

Semester: FALL '16

Instructor: Sowmya Vajjala

Iowa State University, USA

6 December 2016

Class Outline

- ▶ Announcement: Please complete course evaluations! Less than half of the class did it so far!
- ▶ Project presentations (Stephanie and Evan)
- ▶ Discussion about usage of NLP tools with learner language

Discussion on usage of NLP tools with learner language

- ▶ Have a look at Discussion.pdf uploaded in this week's content folder on BlackBoard.
- ▶ It contains the non-programming questions about how existing NLP tools work with learner language, which were a part of your Assignments 3–5.
- ▶ Your task: form into teams of 2-3 people, discuss your answers, and come out with a set of observations as a team, for each of those assignments.
- ▶ Spend some time discussing, and each team should present their conclusions after some time.

Next class

- ▶ Project presentations (Liberato, Sonca, Zaha)
- ▶ Revision and wrapping up
- ▶ oral exams for others: 9-13 December. Fix a time by sending me an email. Time required: 10-15 min. My preferred timing: 1-4 pm on any day during that week.
